To the MA Admissions Committee,

I am recommending Low Saelee for admission to the MA program. Graduate school is an important undertaking, and one I believe that Low is ready for and will enthusiastically pursue.

Low has taken several classes with me and excelled in them. He is an ambitious student, works well with deadlines, is self-motivated, and eager to learn. For instance, Low is currently developing a corpus for an understudied language for the purpose of increasing language representation and assistive technologies for that community. I think Low would be a fine addition to the program, and I would delight in teaching him.

Sincerely,
Jon Rawski
Assistant Professor,
San José State University
